

# React: Styling

## React – Teenage Mutant Ninja Turtles

---

The following exercise contains the following subjects:

- useState
- props
- styling
- rendering list

### Idea

We want to create an application that will help us order pizza for all the turtles, the problem is that you can add up to five toppings to a pizza. [demo](#)

### Instructions

Create an interface that displays turtles cards and each card will have a different turtle and a button list of the toppings he likes to eat.

When the user clicks on an topic it will be added to the list of add topics below the cards.

If five pizza toppings have already been selected and the user adds more, give him a message explaining that he has reached the maximum possible.

If a pizza topping is already selected in the order, present it to the user in a message
