

React: Counter plus

React – Custom hooks

The following exercise contains the following subjects:

- Custom hooks

Instructions

Create a custom hook\.

The hook gets an initial num argument and should return:

value: The current counter.

addOne: a function that will increase the counter by one.

removeOne: a function that will decrease the counter by one.

double: a function that will double the counter.

divide: a function that will divide the counter.

Test the counter in two-components

Use Google!!!
