

## React: useEffect

## React - Box animation

The following exercise contains the following subjects:

useEffect

## Instructions

- 1. We want to create a simple app: a box that slides onto the screen 1 sec after the page loads and then disappears from the DOM after 4 seconds.
- 2. We also want to be able to add 3 such boxes of different sizes.

Here is an example

## Tip:

- checkout CSS property animation, and keyframes
