React: useState

React – Increment and decrement

The following exercise contains the following subjects:

- useState

Instructions

We want to create two buttons and one label.

The first button will increment the counter.

The second button will decrement the counter

A label that displays the current value.

The counter range can only be from -10 to 10.

If the counter is negative the label will be a red color.

If the counter is positive the label will be a green color.

If the counter is 0 the label will be black in color.
