React: Props

React – A Tale of Five Balloons

The following exercise contains the following subjects:

- props
- children

Instructions

Let's start the interface for the story A Tale of Five Balloons.

Create three components:

- Mother component:
  - Displays:
    - Wrapper div element
    - H1 title
    - Child's components
  - holds an array of objects:

```
const kids= [
    { name: 'Ori', color: 'red' },
    { name: 'Ron', color: 'blue' },
    { name: 'Sigalit', color: 'green' },
    { name: 'Ruti', color: 'yellow' },
    { name: 'Alon', color: 'purple' },
]
```

- Child component.

○ Displays:
  - Wrapper div element
  - child's name in the H3 tag
  - Balloon component

● Balloon component
  ○ Displays:
    - div element with the color of the right balloon

Render the five kids' components and each kid will render a ballon component.

Use only children prop to pass data.

Example:
